Anil Kumar Das (Quality Engineering Lead | SDET | Automation Architect | AI & Generative AI Practitioner)

Email: anilfedora@gmail.com

Cell: +91-8763837587

Experience Summary

- 13+ years of experience in Software Engineering, Test Automation, Framework Architecture, and Quality Engineering across enterprise-scale applications.
- Leading a team of 15+ SDET engineers and driving automation initiatives resulting in improved test execution efficiency and framework standardization.
- Driving end-to-end automation transformation initiatives for Mainframe and distributed applications by designing scalable, maintainable, and reusable automation solutions.
- Architecting and modernizing enterprise automation frameworks using Java, Selenium WebDriver, Cucumber BDD, TestNG, JUnit, Apache POI, and REST-based integrations.
- Spearheading migration of legacy automation assets to Page Object Model (POM) and component-based framework architecture to improve maintainability, scalability, and execution efficiency.
- Leveraging GitHub Copilot (GHCP), Claude Code, and Generative AI-assisted development practices to accelerate framework modernization, code refactoring, and engineering productivity.
- Strong expertise in designing Hybrid, Modular, Data-Driven, and Behavior-Driven (BDD) automation frameworks aligned with enterprise engineering standards.
- Experienced in building and optimizing CI/CD pipelines, integrating automated quality gates, regression suites, and deployment validation within DevOps ecosystems.
- Actively contributing to engineering innovation by developing Proof of Concepts (POCs) utilizing the Infosys Vive Studio platform and emerging AI technologies.
- Designing and developing AI-powered micro-solutions to improve engineering productivity, operational efficiency, and intelligent workflow automation.
- Hands-on experience in developing AI Chatbots, Generative AI solutions, and intelligent automation accelerators using modern LLM-based technologies.
- Strong exposure to AI-assisted software development using GPT, Claude, GitHub Copilot, Cursor AI, and enterprise AI platforms.
- Proficient in designing reusable automation utilities, shared libraries, reporting modules, and framework accelerators for enterprise applications.
- Experienced in payload validation and automation using Fiddler, enabling robust API and backend testing solutions.
- Well-versed in Software Development Life Cycle (SDLC), Agile methodologies, DevOps practices, and Continuous Testing strategies.
- Expertise in implementing test automation solutions for Smoke, Component, Integration, System, Regression, and Compatibility Testing.
- Strong experience in code reviews, framework governance, automation standards definition, and technical mentoring across cross-functional teams.
- Skilled in developing dynamic locators, advanced Selenium automation components, custom utilities, and reusable engineering frameworks.
- Experienced in requirement analysis, solution design reviews, traceability management, and stakeholder collaboration to ensure successful project delivery.

- Proven track record of delivering high-quality, business-critical solutions within aggressive timelines while maintaining engineering excellence and operational stability.
- Passionate about exploring emerging technologies including Artificial Intelligence, Generative AI, Agentic AI, Intelligent Automation, and Modern Software Engineering Practices.
- Focused on building scalable engineering solutions that combine Automation, DevOps, and AI-driven innovation to accelerate digital transformation initiatives.

AI & Generative AI Expertise

Possess strong hands-on experience in Artificial Intelligence and Generative AI technologies, with practical exposure to multiple Large Language Models (LLMs) including OpenAI GPT, Claude, Gemini, and other enterprise AI platforms. Proficient in leveraging AI-powered development and productivity tools such as GitHub Copilot (GHCP), Claude, Cursor, and other AI-assisted engineering solutions to accelerate software development, testing, automation, and solution delivery.

Experienced in designing and building AI agents capable of task orchestration, workflow automation, and enterprise integrations. Well-versed in Agentic AI concepts, prompt engineering, Retrieval-Augmented Generation (RAG), semantic search, and LLM-based application development. Possess working knowledge of Model Context Protocol (MCP) and its application in enabling secure integrations between AI models, enterprise systems, tools, and data sources.

Key strengths include:

- Hands-on experience with multiple LLMs (GPT, Claude, Gemini, and enterprise AI models)
- AI-assisted software development using GitHub Copilot, Claude, Cursor, and related tools
- Design and development of AI Agents and Agentic workflows
- Knowledge of Model Context Protocol (MCP) and enterprise integrations
- Prompt Engineering and LLM optimization
- Retrieval-Augmented Generation (RAG) and Semantic Search implementations
- AI-driven automation and productivity enhancement
- Enterprise AI solution architecture and integration

Leadership & Delivery Management Experience

- Experienced in leading large distributed teams and managing resource allocation and workforce planning for 50+ team members across a global delivery model, maintaining an optimal 1:6 onsite-offshore ratio to support project execution and business objectives.
- Responsible for capacity planning, future allocation forecasting, and resource utilization management, ensuring availability of skilled resources to meet evolving project demands and delivery commitments.
- Driving and coordinating cross-functional integration efforts across multiple teams, facilitating collaboration, dependency management, and seamless project execution.
- Managing and maintaining the Project Breakdown Structure (PBS), ensuring alignment between project planning, resource assignments, milestone tracking, and organizational goals.
- Preparing and governing monthly invoicing and financial tracking reports, supporting project budgeting, revenue recognition, and operational governance activities.
- Served as a Scrum Master, facilitating Agile ceremonies including Sprint Planning, Daily Stand-ups, Sprint Reviews, Retrospectives, and Backlog Grooming sessions, while promoting Agile best practices across the team.
- Proven ability to remove delivery impediments, manage risks and dependencies, track sprint progress, and improve team productivity through effective stakeholder coordination and proactive problem-solving.
- Experienced in collaborating with Product Owners, Business Stakeholders, Development Teams, and Leadership to ensure transparency, timely delivery, and continuous improvement.
- Strong background in team mentoring, performance coaching, technical leadership, stakeholder management, delivery governance, and engineering excellence initiatives.
- Adept at balancing technical leadership, people management, project governance, financial tracking, and strategic planning to drive successful project outcomes and organizational growth.

Education

B.Tech in Electronics and Communication Engineering from Modern Institute of Technology & Management, Bhubaneswar, affiliated to Biju Patnaik University of Technology (BPUT), Odisha (2008-2012).

Career Profile

Dates	Organization	Position
JUL 2013 – APR 2015	Verchaska Infotech Pvt Ltd.	Automation Test Engineer
APR 2015 – Till Present	Infosys Ltd	Test Lead / Associate Architect

Certifications And Training

- Claude Certified Architecture Fundamentals
- GitHub Copilot Fundamentals
- Certified Selenium Professional.
- Redhat Certified Engineer
- Redhat Certified System Administrator.

Personal Information

Nationality	INDIAN
Languages	English, Odia, Hindi
DOB	19 Feb 1991
Permanent Address	At-KuruntiPo-kothapatana,Cuttack,754001
